PROFESSIONAL SUMMARY

B.Tech Computer Science and Engineering student focused on software development, blockchain security, and AI-supported risk analysis. Building RugShield, a Solana token risk-scoring engine that combines rule-based checks, machine-learning probability, Redis event processing, and API-ready output for explainable token risk detection.

EDUCATION

SRM Institute of Science and Technology, Ramapuram, Chennai

2025 - 2029

Bachelor of Technology (B.Tech) - Computer Science and Engineering | GPA: 9.27 / 10.0

Relevant Coursework: Object-Oriented Programming, Database Management Systems, Programming Fundamentals, Web Development Basics

Alwin Memorial Public School (AMPS), Chennai

Completed 2025

CBSE - Class XII

CORE SKILLS

Programming:	Python, JavaScript, SQL
Web Development:	HTML5, CSS3, React.js, Tailwind CSS
Backend / APIs:	Backend Fundamentals, REST API Basics, API Integration, Redis Basics
Databases:	PostgreSQL, DBMS Fundamentals
AI / Data:	scikit-learn, pandas, NumPy, Machine Learning Fundamentals, Model Evaluation
Tools / Environments:	Git, GitHub, Linux
Core CS:	Object-Oriented Programming, Database Management Systems

SELECTED ENGINEERING PROJECTS

- * RugShield - Solana Token Risk Scoring Engine (In Progress)**
Technologies: Python, scikit-learn, pandas, NumPy, Solana RPC API, Metaplex, Redis, PostgreSQL, Git/GitHub
 - * Engineered the P2 backend scoring pipeline to evaluate 18 risk signals across authority, liquidity, holder concentration, wallet graph, trading behavior, and social legitimacy checks.
 - * Generated a 0-100 token risk score with LOW, MEDIUM, HIGH, and CRITICAL levels by blending 60% rule-based scoring with 40% Gradient Boosting ML probability.
 - * Built an API-ready scoring response containing final score, risk level, triggered signals, and explanation fields to support P3 frontend/API integration.
 - * Added Redis-based event processing support for real-time token scoring workflows and fallback handling when live blockchain/API data is unavailable.
- * My Portfolio - Personal Developer Portfolio Website**
Technologies: React.js, Tailwind CSS, JavaScript, GitHub Pages
 - * Deployed a live React portfolio on GitHub Pages with reusable project, skills, and contact components for recruiter-facing project presentation.
 - * Live site: sarvesh2838.github.io/My-Portfolio

CERTIFICATIONS

- * Microsoft Python Development Certificate
- * Google AI Professional Certificate
- * Google IT Support Professional Certificate
- * Google UX Design Professional Certificate - Coursera

ACTIVITIES & ACHIEVEMENTS

- * Participated in 5+ national/international hackathons, including GameTrade Hackathon at IIT Madras.
- * Participant - International Level Hackathon 360 - 3.0.
- * Joined Devpost hackathon programs and Microsoft AI Skills Fest 2026.
- * Active in GeeksforGeeks coding and student learning initiatives.
